How to install Arduino

Dr Frazer Noble

Introduction

In this presentation, I will describe:

- How to install Arduino's IDE.

Get Arduino

Browse to https://www.arduino.cc/.

Something similar to the following will be displayed:

Figure: https://www.arduino.cc/.
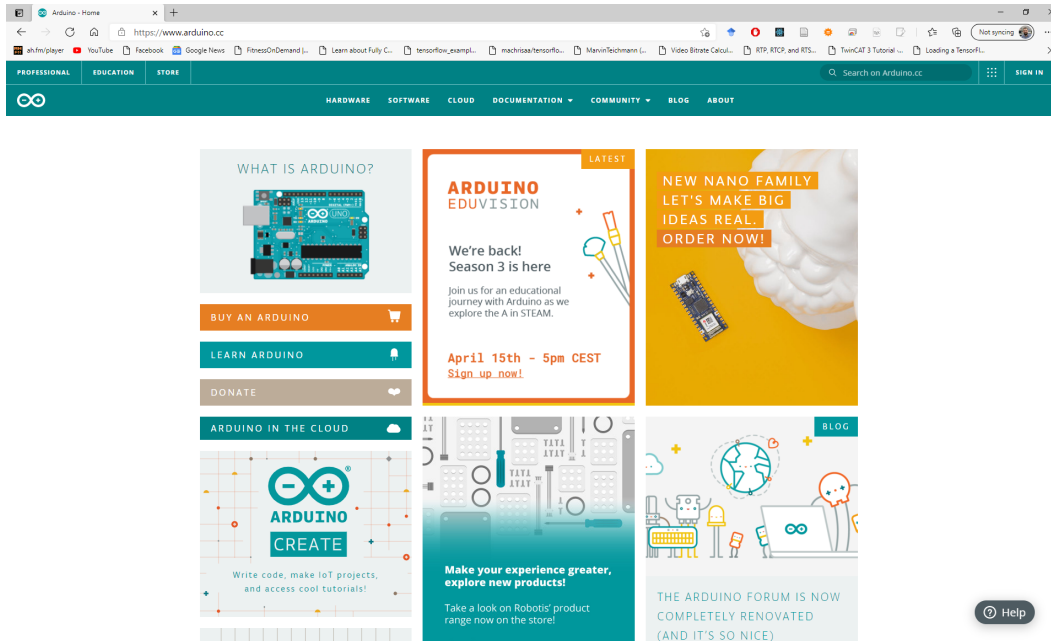

Left click on the "Software" button.

Something similar to the following will be displayed:

Figure: https://www.arduino.cc/en/software.
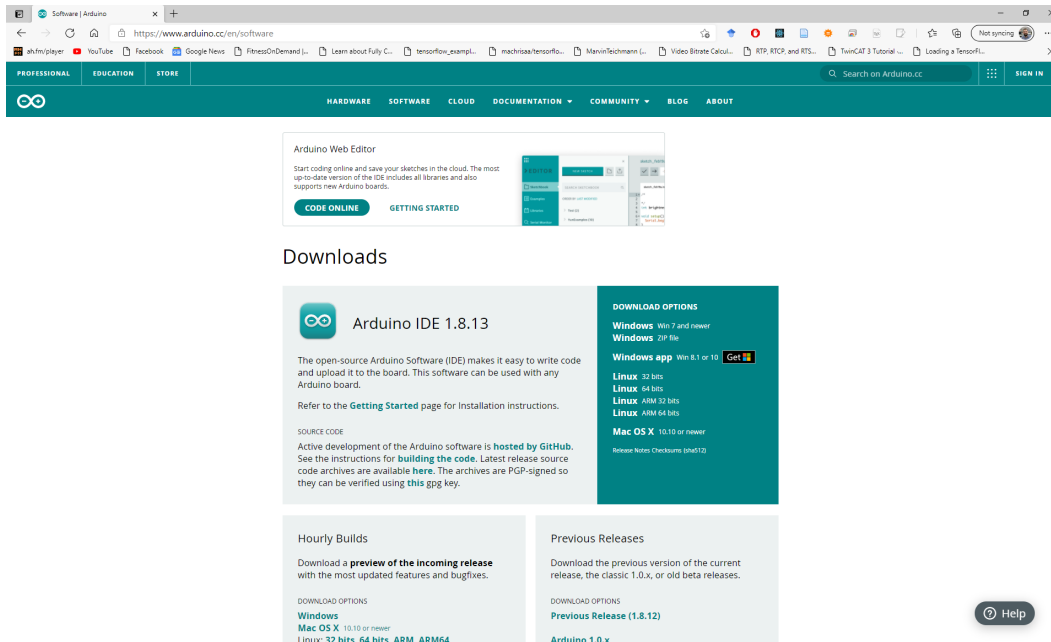

Left click on the "Windows" link (under "Download Options").

Something similar to the following will be displayed:

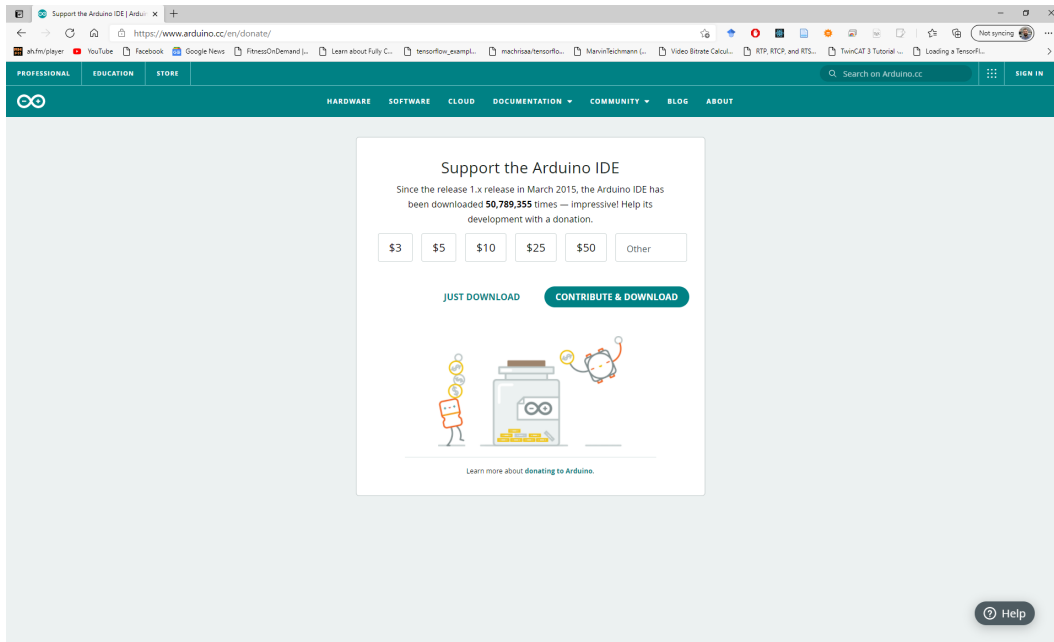

Figure: https://www.arduino.cc/en/donate/.

Left click on the "Just Download" button.

Browse to where Arduino's setup program was downloaded.

Either:

1. Double click on program's icon;
   or,

2. Left click on the program's icon and press `Enter`.

This will start the installation process.

Arduino Setup: License Agreement

Something similar to the following will be displayed:

Figure: Arduino Setup: License Agreement window.

Left click on the "I Agree" button.

Arduino Setup: Installation Options

Something similar to the following will be displayed:

Figure: Arduino Setup: Installation Options window.

Left click on the "Next >" button.

Arduino Setup: Installation Folder

Something similar to the following will be displayed:

Figure: Arduino Setup: Installation Folder window.

Left click on the "Install" button.

Installing

Something similar to the following will be displayed:

Figure: Installing window.

Wait for the installation process to complete.

Arduino Setup: Completed window

Something similar to the following will be displayed:

Figure: Arduino Setup: Completed window.

Left click on the "Close" button.

Arduino

Open the Start menu, type "Arduino", and select the app.

Something similar to the following will be displayed:

Figure: Arduino's IDE.

Congratulations: you have successfully installed Arduino's IDE!

Conclusion

In this presentation, I have described:

- How to install Arduino's IDE.
